

Worksheet „Amber“ (Solution)

_____ is a tree secretion. From _____ in the _____ it comes out. The _____ falls over and gets off _____ covered. At some point there is a _____ of earth on it. No _____ is coming to the resin now. Very _____ the earth pushes the resin together. The resin gets _____ and _____ until it becomes a stone. Now the resin has become an _____. You can find it in the _____.

air – amber - Baltic Sea - bark - earth - harder (2x) - Resin - strongly - thick layer - tree - wounds

Worksheet „Amber“ (Solution)

Resin is a tree secretion. From wounds in the bark it comes out.

The tree falls over and gets off earth covered. At some point

there is a thick layer of earth on it. No air is coming to the resin

now. Very strongly the earth pushes the resin together. The resin

gets harder and harder until it becomes a stone. Now the resin

has become an amber. You can find it in the Baltic Sea.

air – amber - Baltic Sea - bark - earth - harder (2x) - Resin - strongly - thick layer - tree - wounds
